Why should you have it?

A „must have“ for any university with with a focus on PHD students

- ❑ Find out if topic and approach has been previously studied. Identify if there is a strategic gap in the literature.
- ❑ Dissertations, being longer than journal articles cover topics more comprehensively (than journal articles).
- ❑ Source of current and up-to-date literature reviews (with extensive bibliographies)
- ❑ Source of methodological and theoretical approaches to topic of interest.
- ❑ Provide recommendations for future research.
- ❑ Source of more extensive data on tests and measurement instruments.
- ❑ For obscure or esoteric topics, there may be very little existing literature (journals and monographs) but there is likely to be one or several dissertations
- ❑ They serve as examples or guidance on expected thoroughness and writing styles.

Myocardial Infarction

From Encyclopedia Britannica Online

Myocardial infarction (MI) or acute myocardial infarction (AMI), commonly known as a heart attack, results from the interruption of blood supply to a part of the heart, causing heart cells to die. This is most commonly due to occlusion (blockage) of a coronary artery following the rupture of a vulnerable atherosclerotic plaque, which is... [Read more](#)

The screenshot shows a search results page from a University Library. The search term is 'Biotechnology', and it returned 2,376 results. The page features a 'Refine your Search' sidebar with filters for Format, Subject, and Publication Date. The main content area displays a list of search results, with the top result being a book titled 'Molecular biology and biotechnology: a guide for students' by Ian W. Sutherland. A preview window is open over this result, showing the abstract and availability information. The text 'One Result List' is overlaid on the search results area.
